

WE CLAIM

1. A system for monitoring potentially hazardous atmospheres in work areas
5 including as part of a central console unit, a central single gas fixed gas monitor
fitted with a master radio transmitter unit adapted for communication with a
plurality of mobile slave radio-page units.
2. A system according to Claim 1 in which each radio-page unit is portable.
10
3. A system according to Claim 2 in which the radio-pager unit is wearable.
4. A system according to Claim 1 in which in use upon detection of a hazard by
the central monitoring unit an alarm is automatically transmitted by the master
15 unit to all the slave units.
